

Indiana or any other state people do not want to be bothered or I should say hounded by unwanted phone calls. Especially people like me that are sick, we had to turn off the ringer on our telephone to be able to eat or sleep in peace, before you the Indiana Telephone Privacy program started. I want to see all of the unwanted telephone calls continued to be stopped. We as the people and the person that pays their telephone bills, we should not have to put up with getting rude telephone calls. You basically have to hang up on them. Life has been so much better since I first received my first petition in my email box; I signed the petition to stop the nuisance of the telemarketers and other organizations. We have our rights not to be invaded and our privacy taken away! Thank you, and keep up the good work!

Signed K. Ramona Patrick and my Husband Gary D. Patrick
